

TENSATOR®

NIGHTVIEW™

**THE WORLD'S FIRST
INTERWOVEN REFLECTIVE
WEBBING**

Secure hazardous areas in a high visibility way in low light conditions creating a safer working environment.

NightView™ features two strips of highly visible light reflective strands which are directly woven into Tensator's industry finest webbing.

NightView™ is available as an optional upgrade on all new Tensabarrier® products and is fitted as standard in all new Tensator® Airport Passenger Guidance systems. For a free, no obligation evaluation on whether NightView™ can be installed in your existing Tensabarrier® products, please contact Tensator®.

MINIMISE RISKS WITH NIGHTVIEW™, THE WORLD'S FIRST INTERWOVEN REFLECTIVE WEBBING

Developed to help improve visual safety in all working environments, indoor, outdoor and in all weather conditions, NightView™ can be used across a variety of applications including:

- ➔ Emergency situations
- ➔ Road works
- ➔ Building sites
- ➔ Entrances & exits
- ➔ Events & leisure facilities
- ➔ Airports

TENSATOR®

Improve visibility of potential hazards and create a safer working environment with **NightView™** reflective webbing by Tensator®
