

# EasyQ® Premium

## with 175mm Magnetic Base

The magnetic base is ideal for areas where you need to remove or re-configure your queue layout on a regular basis.

Made in India

Magnetic Base

Floor plate with optional fixing holes

### Features & Benefits

- The EasyQ® Premium queue manager is manufactured with high quality stainless steel.
- The low profile 175mm diameter magnetic base combines the stability and location correctness of a fixed base with the flexibility of a free-standing EasyQ® queue manager.
- Ten magnets fitted into the base engage securely with a steel plate that is secured to the floor surface using a high strength adhesive.
- The floor plate doesn't pose a trip hazard due to its bevelled edge, and it can easily be removed from the surface and re-located without damaging the floor. Auxiliary screw fixing holes are present for added strength.
- The low profile edge of the fully machined base ensures wheelchairs, pushchairs and suitcases can roll over the base with ease - creating a less obstructive queue environment.
- The floor plates mark out the queue layout, saving time if the queue formation needs to be re-configured or the posts replaced if they are removed.
- The external retractable belt cassette has 2.75 metres of tape with three receiving tape connectors and a hook tape end that allows for webbing connectivity to other EasyQ® Premium queue managers.
- Custom digital printing available on both sides of the tape.
- Post and base available in a range of colours and finishes.
