

TENSATOR®

**In-Queue Merchandising
Solutions**

Our Value Proposition

Tensator understands the pressure for improved efficiencies, incremental sales and profit growth. We provide merchandising and queue management solutions that are proven to provide positive results in each of these areas.

The queue provides the smart retailer with the opportunity to extend the shopping experience, transforming what would otherwise be unoccupied waiting time into valuable extra revenue generating minutes often at high margins.

This extends to all areas of the business including 'tills', self-checkouts, and collection points for BOPIS. While the shift over the last couple decades has moved to online sales, BOPIS helps you to blend the online and in-store experience. With the addition of IQM you can further engage with these customers during their limited in-store experience and maximize sales further.

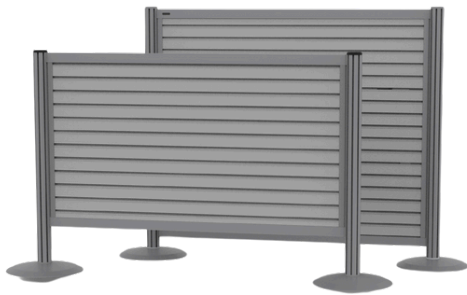

IQM improves the in-store experience and maximizes sales. A beneficial solution for brick and mortar stores.

Building Your IQM® System

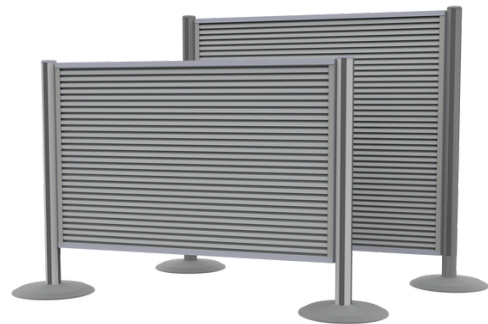

Tensator In Queue Merchandising systems provide a one-of-a-kind customized layout that assists in creating increased sales through a variety of front-end product showcase options. Unique panel designs allow retailers to merchandise a wide range of products for their front end. We have materials to meet every budget and need:

- Aluminum slatwall
- PVC slatwall
- Wood panel slatwall
- Wire grid

PVC Slatwall

Standard and extra height panel

Aluminum Slatwall

Standard and extra height panel

Wood Panel Slatwall

Standard and extra height panel

Wire Grid

Standard height 48" x 48"

Tensator also offer several IQM accessories designed to slot onto our IQM panels and wire grid. These accessories allow businesses to further showcase their products at the point of sale to capture last minute impulse purchases.

InQM Accessories

Display Bowls

Clear acrylic merchandising bowl Tensabowl, comes alone or with frame (5"x7" or 7"x11") and/or dividers.

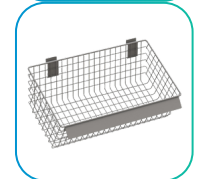

Hooks & Prongs

Scan tag hooks in polished chrome, 4", 6", 8".

Baskets

Basket goes on the front or back of the panel.

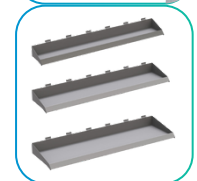

Impulse Boxes

Acrylic merchandising trough, sits on top of the panel and is divided into 4 sections.

Shelves

4ft metal shelving with price strip, comes in 8", 11", 14" deep, color is standard light metallic silver.

Half Bin

Half bin merchandiser, goes on the front or back of the panel.

Benefits

- Capture impulse purchase revenues from waiting customers.
- Flexibility to change merchandise for seasonal campaigns.
- Applicable to any environment, easy to install, zero drilling required.
- Accommodate branding requirements and mimic store design.

Complimentary Solutions

Single-Line-Queue

Implementing a single-line queue in retail settings can enhance the overall customer experience and operational efficiency of the store. A single line queue has been proven to be the fairest and fastest way to process customers – they are served in the order they arrive. Paired with our IQM, you can further enhance the experience and boost impulse sales.

InQ-TV®

The InQ-TV® adds media to your existing queueing environment enabling you to play targeted messages and promotions to a captive audience within your queue. Increase brand presence with promotions, or add an additional revenue stream with third party advertising. Ideal for retail environments with an IQM® system.

Digital Totem

Head of queue digital totem – a stylish addition to any IQM system and eQ™ Single Line Queue (SLQ) call forward system.

The digital totem can be placed at the head of a single line queue as part of our eQ™ call forward portfolio - manual or self-checkout formats. It acts as a digital screen that lets waiting customers know which service position is available.

Can be used for special offers or promotions, customer information or sold as advertising space.

Tensator Customers

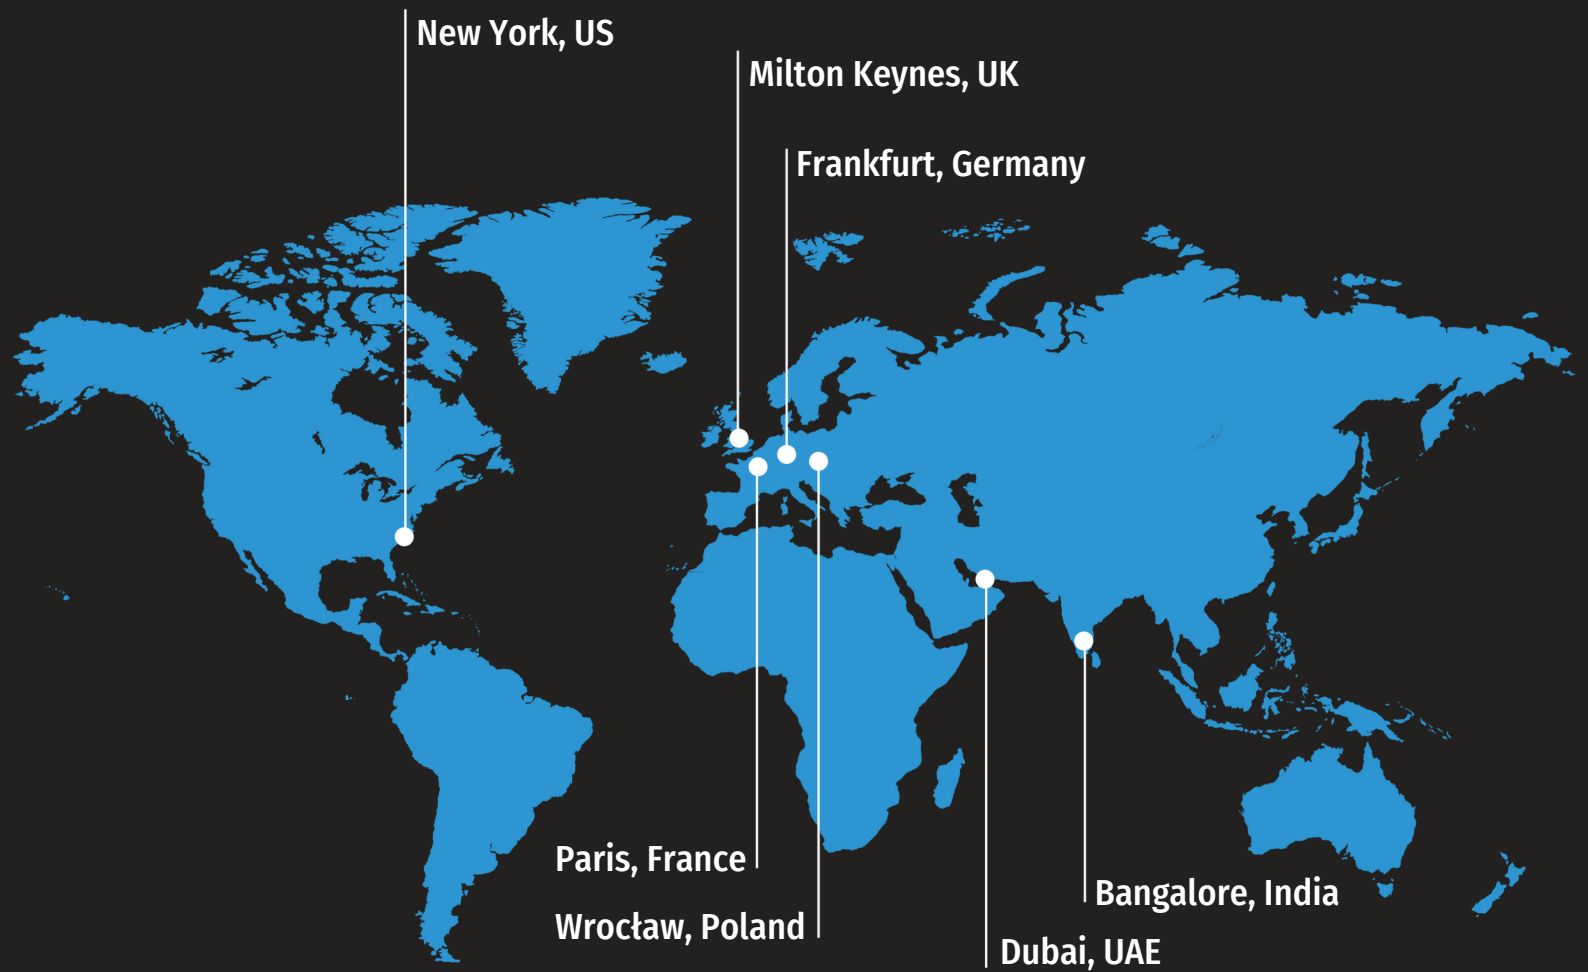

About Tensator

Tensator® has been providing innovative queue management solutions across the globe for more than 50 years. As inventors of the world's first retractable queue barrier, we are recognized for our range of market leading products and our ability to provide custom systems to meet individual requirements.

We understand the challenges within modern retail stores and are always looking for opportunities to enhance the customer journey, from arrival through to the purchase. Our queue solutions are designed to solve problems and maximize efficiencies, whilst keeping the needs of the future in mind.
