

TENSATOR®

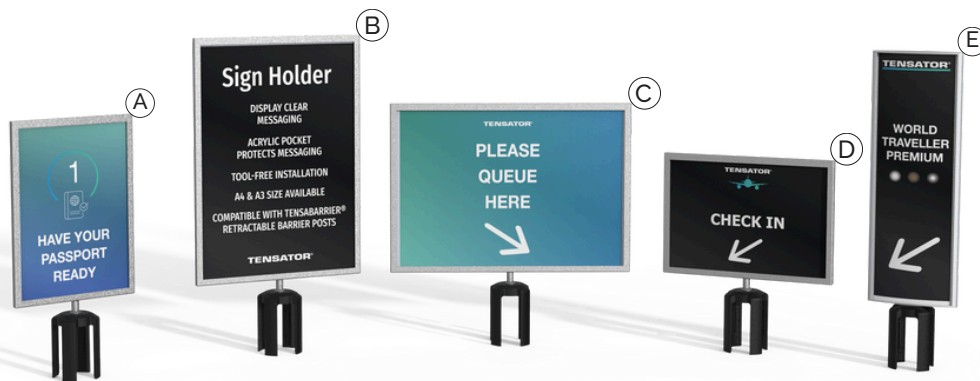

**Wayfinding & Signage
Solutions**

Signage

The Tensabarrier® Post Top Signage is a very popular add-on for its versatile usage. Signage is highly visible and customizable signage that can be used to clearly identify the start or head of a line or to provide information within a store.

The signs can be easily swapped out so you can always display your latest message. Typical uses include wayfinding, informing safety measures or promotional messages.

- Ⓔ **Blade Profile sign holder**
2.4" x .90 cm artwork area

Tensamedia® Eco Mediablade Sign

A plastic-free, fully recyclable, promotional signage solution designed for tool-free fitting on any standard Tensabarrier. Perfect for short-term marketing and brand awareness campaigns.

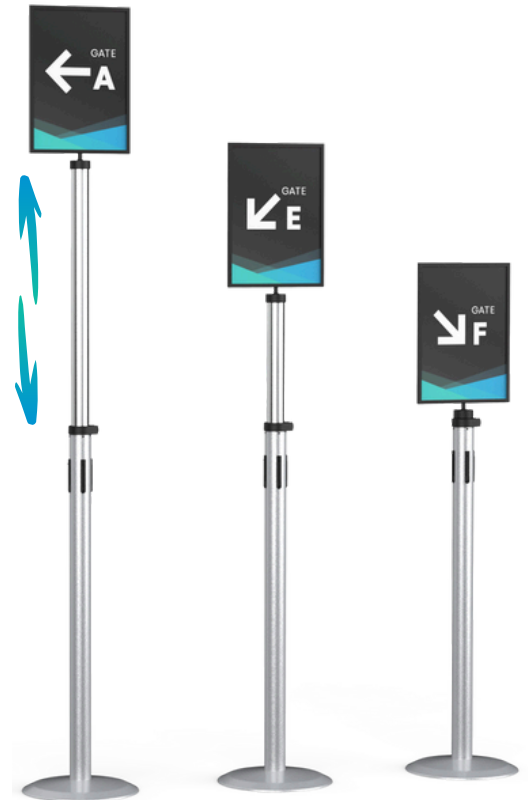

Suitable for indoor use only in these and other environments:

- Retail
- Leisure & Tourism
- Airports
- Events
- Stadiums

Telescopic post

A versatile signage solution that can be easily be raised above eye-level to give effective guidance and instruction. More effective than lower-level signage and ideal for a variety of applications.

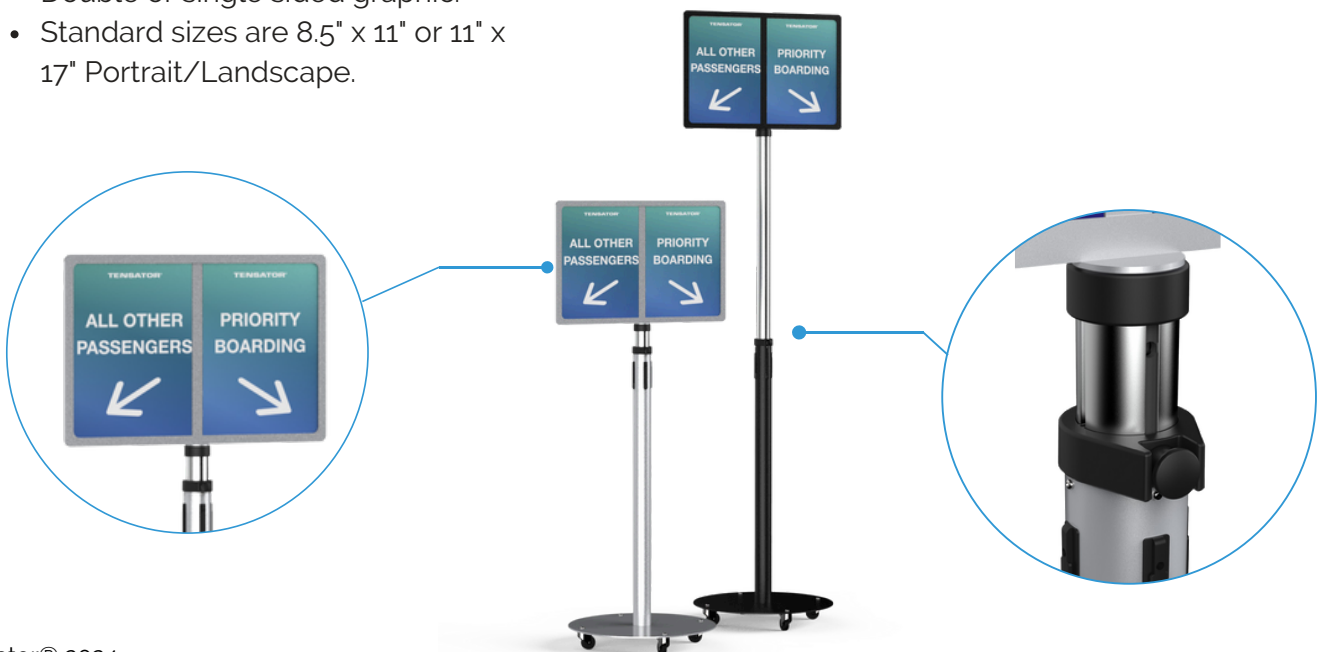

- Easily incorporated into your Tensabarrier® queuing system.
- Features interlocking telescoping tubes that lock into place at a variety of heights, enabling the sign frame to be raised and locked off up to a maximum of 7.8ft - this is dependent on sign frame size.
- The lower post has a set of four receiver splines which allow webbing connectivity from other Tensabarrier® posts.
- Lockable height adjustment up to maximum of 7' 10".
- Standard sizes are 8.5" x 11" or 11" x 17" Portrait/Landscape.
- Custom sizes available upon request.

Tensabarrier® Twin Signholder Telescopic Post

- Twin sign holder with clear acrylic sandwich insert.
- Double or single sided graphic.
- Standard sizes are 8.5" x 11" or 11" x 17" Portrait/Landscape.

Base edges taper towards the floor to ensure wheelchairs, strollers and suitcases can roll over the base with ease – enabling accessibility for all.

Fluted InQ-Totem®

A lightweight, high-visibility signage solution that fixes to a Tensabarrier® to display impactful brand campaigns, directional messaging and customer guidance.

Improved Customer Flow:

Display important messaging to ensure a seamless journey, such as boarding group information.

Highly Visible:

Branding and artwork easily seen by customers or passengers.

Eye-catching:

Above crowd height profile can be seen from distance.

Lightweight:

Easy to lift, fit, and transport.

Customizable

Print with messaging, branding, artwork, and colors depending on design needs.

Space Saving:

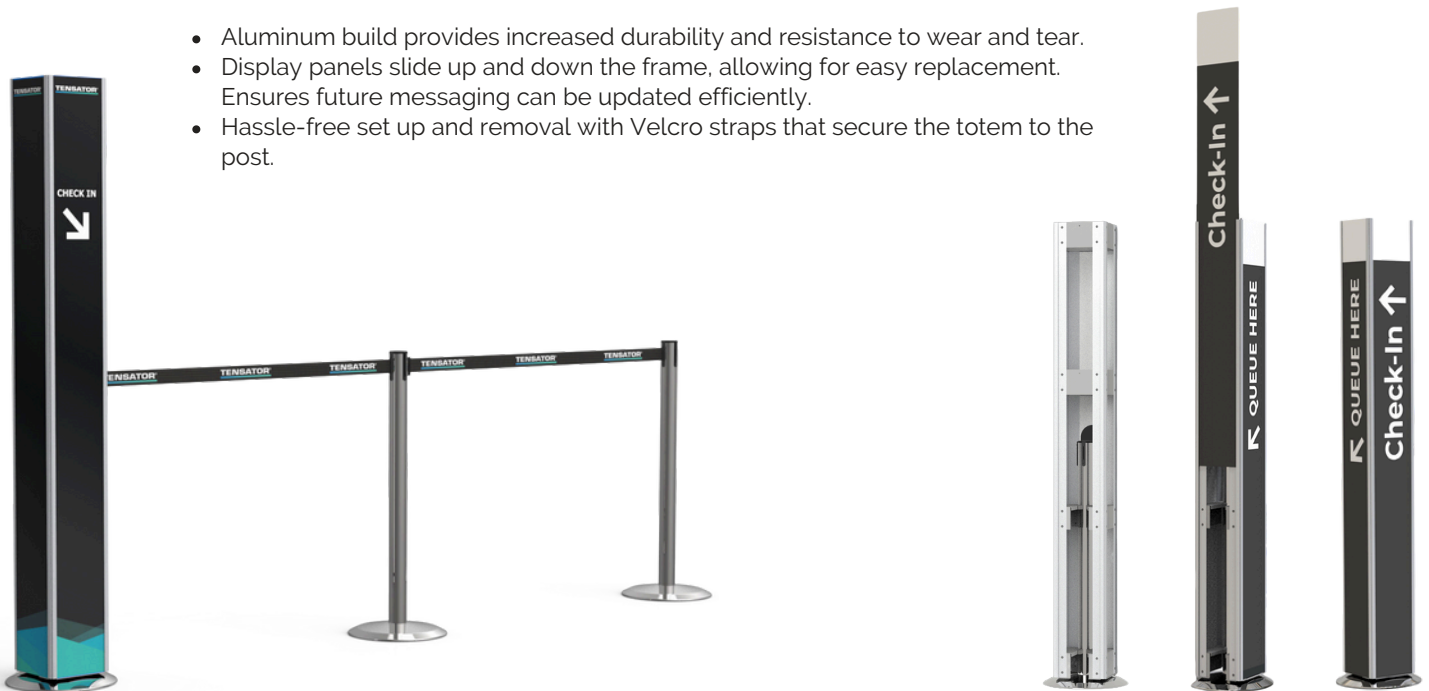

Integrates the signage directly onto your line system, minimizing the footprint.

Aluminum Totem

A highly visible signage solution with four replaceable panels. It secures around Tensabarrier® posts to display impactful brand campaigns, directional messaging and customer guidance.

- Aluminum build provides increased durability and resistance to wear and tear.
- Display panels slide up and down the frame, allowing for easy replacement. Ensures future messaging can be updated efficiently.
- Hassle-free set up and removal with Velcro straps that secure the totem to the post.

InQ Mobile Totems

A mobile, high-visibility signage solution that can be positioned at key locations and relocated with ease. Display impactful customizable graphics such as brand campaigns, directional messaging and customer guidance.

Improved Customer Flow:

Display important messaging to ensure a seamless journey, such as boarding group information.

Portable: 4 x heavy-duty wheels allow the totem to be moved and positioned at key locations.

Professional: High quality printing with custom branded artwork.

Eye Catching: The profile of the totem is above crowd height and can be seen from a distance.

Robust: Manufactured with an extruded aluminum framework with resilient Foamex panels to ensure longevity.

Stable: Braking system to ensure the totem remains in place when not in use.

Customizable: The size of the totem can be made to order depending on height and length requirements.

(A) InQ Totem® Mobile

Up to 7' 2" tall
1' 7" wide
Flat floor plate/Mobile base

(B) InQ Totem® Large

Up to 6' 6" tall
3' 3" wide
Flat floor plate/Mobile base

Magnetic Totem

A mobile, high-visibility signage and wayfinding solution that can be positioned at key locations. The totem offers flexibility to quickly and easily change graphics with the use of magnetic signage to display impactful brand campaigns, directional messaging and customer guidance.

- Flexible: Use magnetic signage on the panels to quickly update messaging such as boarding group information and tasks required for progression.
- Customizable: The size of the totem can be made-to-order depending on height and length requirements.
- Robust: Manufactured with an extruded aluminum framework with thin gauge mild steel panel that has a high quality powder coat finish. Color to be agreed.

Digital Totem

Head of queue digital totem – a stylish addition to the eQ™ Single Line Queue (SLQ) call forward system. The digital totem can be placed at the head of a single line as part of our eQ™ call forward portfolio - manual, auto or self checkout formats. It acts as a digital screen that lets waiting customers know which service position is available.

High-definition 19" digital screen allows for media to be played between calling waiting customers forward. This could be special offers or promotions, customer information or sold as advertising space.

- 19" high-definition LCD screen with 1080 x 1920 resolution.
- Floor fixed base comes as standard
- Built in speakers
- Built in webbing connectivity

Tensaguide®

Tensaguide® with Beams is a modular, multifunctional solution that aids customer guidance and can be incorporated into a line or used as a divider to define areas.

Incorporate the Tensaguide® Modular Barrier range for a long-term queue solution. Designed as a more permanent solution to standard retractable barriers, Tensaguide® beams and panels can be added directly onto your existing posts. Perfect for establishing a robust queue system for visitors.

Media infill panels can be printed with any messaging or branding and are easily interchangeable, creating an ideal platform for eye-catching advertising messages.

Café Banner Screen

A portable solution that can be used for extending or creating indoor or outdoor spaces, easy to install, dismantle and store, the banner is a flexible and cost-effective way to create space with minimal disruption.

The media space on the Café Banner can be tailored to your specific needs, whether it be to provide additional space for branding opportunities, customer centric messages or new product information.

Portal

The InQ-Portal™ is a wayfinding and signage solution which enables you to add overhead signage at the start, within or at the end of your line. It has been created to further organize large queuing spaces, provide information, or allow the public to easily find the front of the correct line.

A modular signage solution, developed to create a defined entrance to your Tensabarrier® queue system. Features a strong aluminum structure which is secured to the floor via four floor plates and bolt fixings. The foam board panels are customizable allowing for information or branding to be printed directly onto each panel.

Correx® Portal

Similar to the InQ-Portal this is also a great wayfinding and signage solution which extends above crowd height to offer guidance and provide directional information. Suitable for various areas of an airport to clearly define queue entrance points.

Made from lightweight yet durable Correx®, this solution is designed to create up to three defined entrances to your Tensabarrier® queue system. It features customizable panels on all four sides, providing 360° view for any branding and messaging.

The portal includes polypropylene sheets, which are light, mobile, fire retardant, and can withstand environmental factors, offering improved print performance and great quality. It wraps around existing Tensabarrier® posts and can be easily dismantled with Velcro fasteners.

Correx Wall Panel System

The Correx Wall Panel System is a modular guidance system designed to aid passenger navigation and division of spaces. It offers great area coverage, effectively separating areas and enhancing visibility control. Its customizable design makes it perfect for showcasing artwork, branding, and messaging, serving as an eye-catching platform for advertising. Fits seamlessly around existing Tensabarrier posts with no tools required for installation.

Mobile Counter

- Manoeuvrable: 4 x lockable wheels allow for easy movement and secure positioning.
- Secure Storage: The internal storage is fitted with internal shelves and secured with a lockable double door.
- Visible: Custom branding and raised sign allows passengers to easily find the correct location.
- Versatile: Suitable for use in various areas the airport terminal such as check-in, departures, boarding gates and lounges.

Fitted shelves and doors can be customised as required

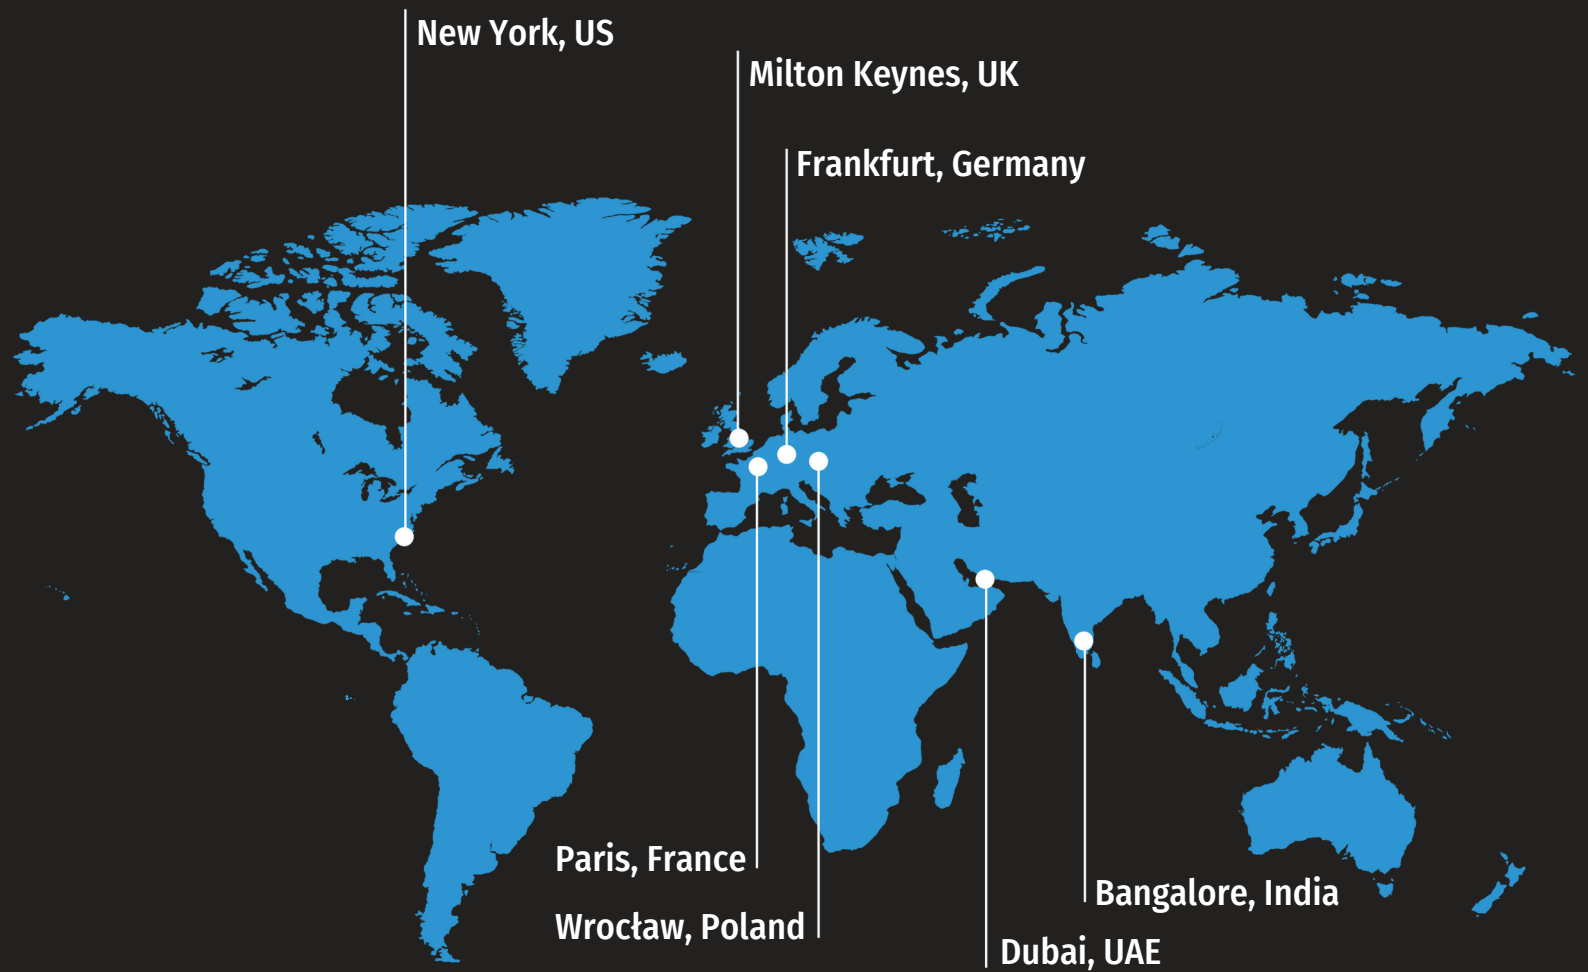

Four heavy duty castor wheels allow the counter to be moved
